---

Located in the South-East part of the Fleurie vineyard, soils are mainly sandy or sandy loam, stemmed from primary rocks (granite) or ancient alluvium, vine age between 40 to 80 years old.

Carbonic maceration in concrete vats with controlled temperature. No input. Pressing after 12 days. 18 months in huge 30hl (800 gallons) barrels (foudres).

Demeter Certified Biodynamic

100% Gamay

---

## About the Winery/Winemaker

Started in 2015 after Marc left a career of building banking software. After working four harvests with Domaine Trévallon, and spending a full year in the vines in 2012 he made the jump to become a winemaker in his own right. His first vintage in Beaujolais was 2014 in the cellar of Domaine De Fa (Alain Graillot). He has two hectares on the steep pink granite slopes at the peak of the Cru of Fleurie, the remaining twelve surround his home on the flat land of the Cru where a top layer of silt covers deep veins of pink granite. The average vine age is forty to eighty years old. From the beginning he has worked organically and biodynamically. Marc often jokes that he is a young winemaker now 65 years old with no signs of slowing down.
