70% Malbec & 30% Cabernet Franc

About the Winery/Winemaker

Since the 2019 harvest, Carbonneau has been in organic conversion with the Ecocert agency and will be in organic certified (AB) from the 2022 harvest. This conversion was a logical decision for the château since it is in line with their desire and commitment to develop the quality of our wines over the years to reflect the expression of the terroir.
This is why in 2021 Carbonneau started the conversion not only of the vineyard but of the farm in its entirety towards biodynamic agriculture. Since the 2023 harvest, the property is biodynamic certified (Demeter). Whether it is on the vineyard or in the winery, Wilfrid, his son Pierre and their team are committed to produce wines that express all the potential of Carbonneau's terroir.
